Assistant Engineer (Electrical), Class 2025

Building Department

What is the aim of Paris Agreement in 2015? (Note : C indicates Celsius)

A

To keep the decrease in global average temperature to below 2

B

To keep the decrease in global average temperature to above 2

C

To keep the increase in global average temperature to above 2

D

To keep the increase in global average temperature to below 2 **Correct**

Correct Answer: D

Full Detailed Explanation

Concept & Reasoning The agreement's temperature objective concerns limiting anthropogenic warming relative to pre-industrial conditions. It does not promise that global average temperature will fall; it seeks to constrain the magnitude of further increase through nationally determined contributions and progressively stronger climate action. How to Solve It in the Exam Paris = limit the increase, not cause a temperature decrease. Important Exam Point Watch sign/direction words: increase vs decrease, above vs below. Related Revision Path This question sits in the revision path Energy and Environment Climate Policy Paris Agreement .
