

Easy

Assistant Engineer (Electrical), Class 2025

Building Department

Which of the following is typically NOT controlled by a building's Audio-Video (AV) system?

A

Projectors and screens in a conference room

B

Background music system

C

Video conferencing equipment

D

The building's fire hydrant pressure

Correct

Correct Answer: D

Full Detailed Explanation

Concept & Reasoning Building ELV disciplines have distinct functional scopes. AV handles sound and visual communication/presentation. Fire hydrant pressure is monitored through pressure switches/transducers and fire-pump/fire-alarm or BMS interfaces as appropriate. Recognizing subsystem boundaries is essential in building-services design. How to Solve It in the Exam Ask whether the item produces/manages audio-video content. Important Exam Point Do not confuse integrated dashboards with the underlying subsystem responsibility. Related Revision Path This question sits in the revision path Building Electrical Services → ELV Systems → Audio-Visual Systems .
